PROFESSIONAL SUMMARY

Python Full Stack Developer experienced in building real-time, two-sided web applications using Django, SQLite, HTML5, CSS3, Bootstrap, and JavaScript. Developed a production-style job portal with a candidate portal and recruiter platform, full Django ORM integration, and dynamic front-end features. Focused on clean architecture, scalable backends, and end-to-end web development delivery.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++ | **Frameworks:** Django 5.2, Bootstrap 5 | **Frontend:** HTML5, CSS3, JavaScript ES6+ | **Databases:** SQLite, MongoDB | **Tools:** Git, GitHub, Django Admin, Django ORM, Q Objects

PROJECTS

Job Portal Web Application — Python/Django Full Stack (Real-Time Project)

Python · Django 5.2 · SQLite · HTML5 · CSS3 · Bootstrap 5 · JavaScript | 2024 – Present

- Built a two-sided job portal platform with a candidate portal for job seekers and a recruiter platform for employers, modeled after Naukri.com, with complete end-to-end Django backend integration.
- Designed core Django app with Job, UserProfile, and JobApplication models; enforced unique_together constraint preventing duplicate applications without requiring user login.
- Engineered a real-time 14-category filter system using Django ORM Q objects and GET-based form submission; filters activate instantly via JavaScript with zero page reload.
- Built employer dashboard with Django views and HTML/CSS/Bootstrap frontend for job posting, applicant tracking, and status management; debugged SyntaxErrors, naming conflicts, and NULL field issues.
- Delivered Django pagination preserving GET parameters, company logo display with letter-based fallback, and a LocalStorage bookmark feature with toast notifications.

PROFESSIONAL EXPERIENCE

Python Full Stack Developer (Freelance / Self-Directed) | 2024 – Present

Independent Projects — Hyderabad, India

- Scoped, designed, and delivered multiple full-stack Django web applications end-to-end, simulating a complete software development lifecycle from requirements through submission-ready build.
- Resolved production-level bugs in Django projects: duplicate dictionary key SyntaxErrors, view/import naming conflicts, and NULL field data via Django Admin — demonstrating real-world debugging.
- Applied web development best practices including MVC architecture, DRY principles, and responsive Bootstrap layouts across all full-stack Python projects.

EDUCATION

B.Tech — Computer Science and Engineering | Jawaharlal Nehru Technological University Hyderabad | 2020 – 2024 | CGPA: 6.56

Board of Intermediate Education — M.P.C | CGPA: 8.0

CERTIFICATIONS

- Pursuing Django REST Framework and advanced Python web development certification (2025).
- Completed practical full-stack web development training through real-time project builds: Django, SQLite, HTML5, CSS3, Bootstrap, and JavaScript.
